Dade. 1632.

A Prognostication, in which you may behold the state of this yeare of our Lord God 1632.

Being the *Leape-yeare.*

Made and set forth by *William Dade* Gent.

LONDON,
Printed for the Company *of Stationers.*
1632.

The beginning and ending of the Termes this present yeare 1632. with their Returnes.

Hillary Terme, beginneth on the 23. of January, and doth end on the 12. of February, & hath 4. Returnes

1. Octabis. Hillarie.
2. Quind. Hillarie.
3. Crasti. Purifica.
4. Octabis. Purifica.

Easter Terme, beginneth the 18. of April, & endeth the 14. of May, and hath 5. Returnes.

1. Quind. Pasch.
2. Tres Pasch
3. Mense Pasch.
4. Quinque; Pasch.
5. Crasti. Ascen.

Trinity Terme beginneth the 1 of June, & endeth the 20. of June, and hath 4 Returnes.

1. Crast. Trin.
2. Octab. Trin.
3. Quind. Trin.
4. Tres Trin.

Michaelmas Terme begins the 9. of October, and endeth the 28. of November, and hath 8. Returnes.

1. Octabis Michael.
2. Quind. Michael.
3. Tres Michael.
4. Mense Michael.
5. Crast. Animarum.
6. Crastin. Martini.
7. Octabis Martini.
8. Quind. Martini.

Note also, that the Exchequer openeth eight dayes before any Terme begins, (except Trinity Terme) in which it openeth but foure daies before.

A true Deſcription of the foure Quarters of this yeare.

And firſt of Winter.

☉. in ♑. ♒. ♓.

THE Winter Quarter (Aſtronomicall) for this yeare 1632. began the laſt paſſed yeare 1631. upon Monday the 12. day of December, when the Sunne did enter the firſt degree of Capricorne, and doth end this yeare upon Sunday the 10. of March; for then the Sunne entereth into Aries, making the firſt Equinoctiall.

This Winter Quarter of his proper nature is cold and moyſt, and of complexion Flegmaticke, good for whole and ſound people, but dangerous to thoſe that are ſick and diſeaſed. In this ſeaſon the inward parts of every ſenſible creature are very hot and being healthfull they may receive great plenty of Foode, becauſe naturall

heate is now comforted, for it is driven inwards, and there increaseth, and maketh the digestion more strong.

The Sicknesses whereunto this Quarter is most inclined, are, Rheumes, Goutes, Palsies, Pushes, sore eyes, coughes, melancholly, cathars, sciaticaes, paine in the breast and lungs, with divers infirmities amongst Women, &c.

As for the judgement of the weather, you may see it in the daily disposition of each moneth hereafter following.

Of the second Quarter of the yeare called the Spring.

☉ in ♈. ♉. ♊.

THE Spring-time (being the second part of the Astronomicall yeare) taketh his beginning on Sunday the 10. day of March, when the Sunne entreth into the first degree of Aries, the Equinoctiall point, making the dayes and nights of equall length: This Spring Quarter continueth untill Tewesday being the 12 day of June following, when the Sunne enters into the Signe Cancer.

This

This ſeaſon is naturally hot and moiſt, and is of the ſanguine complection, being the moſt temperate and healthfull time of the yeare; yet bringeth it (or rather ſheweth forth many diſeaſes, not ingendering them by exceſſe, but diſcovering them which were inwardly bred by the diſtemperature of other times; yet it is the moſt fitting ſeaſon to expell diſeaſes that have beene of any long continuance.

The Infirmities of this Quarter are meaſels, ſmall pockes, ſcabbes, agues cholicke, burning feavers, and others proceeding of corrupt blood.

Of the third part of the yeare, called Summer.

☉ in ♋ ♌ my.

THE Summer, (accounted the third part of the yeare Aſtronomicall) being naturally hot and dry, and of the cholericke complection, doth begin at the Sunnes entrance into the firſt degree of Cancer, which will be this yeare upon teweſday the 12. day of Iune, where he maketh his Summer Solſtice, and hath his

greateſt declination to the north from the Equinoctiall: Now are the dayes longeſt, and the nights ſhorteſt; and Summer doth continue untill thurſday being the 13 of September.

Now cannot the ſtomacke digeſt ſuch hard meates as it may in the winter ſeaſon, for the naturall heate is now diſtributed unto the exterior parts, and man is not ſo hot within as in Winter.

The ſickneſſes of this ſeaſon generally, are hot feavers, and burning agues, ſcabs, puſhes, jaundies, vomits, ſore mouth and throate, with paine in the head and backe.

Of the fourth part of the yeare called Autumne or Harveſt.

☉ in ♎. ☽ ♐. ♀.

HArveſt or Autumne, being the fourth and laſt part or Quarter of this yeare (with the Aſtronomers) being naturally colde and dry, and of the melancholy complection, beginneth on thurſday the 13 of September, when the Sunne forſaketh the laſt degree of Virgo, and then he entreth into the firſt degree of Libra, where he then maketh

maketh the Equinoctiall Hyemall, working the ſame effect that he did at his going into Aries, that is, making the dayes againe of an equall length to the nights, he riſing at ſixe in the morning, and ſetting at ſixe at night: and this Quarter doth end on wedneſday of 12 of December.

Of all the other Quarters this is the moſt unwholeſome, for it is more ſubject to ſickneſſes than any other, for the dregs of all the diſeaſes of the former part of the yeare will burſt forth and ſhew it ſelfe.

The diſeaſes of this Quarter are many and dangerous, as blacke-jaundies, dropſies, conſumptions, megrims, falling-ſickneſſe, pyles, emerods, ſpleene, crampes, tooth-ach, coughes, melancholy, &c.

A briefe Description how the Planets are placed above the Earth in the Skie, for every moneth after *Sun-setting, or before his rising, by which* you may perceive how they keepe their motion day and night all the yeare. Moreover, the New, Full, and Quarters of the Moone, with Astrologicall iudgement of the weather for each day of the yeare. Also Husbandry Instructions for each moneth of the yeare.

Of Ianuarie.
